GROUP 3600

Add the following new claims 50 - 71 as follows:

Fig 4
C
112?

50. (New) An elongated horizontal transitional trim product for concealing the gap between an upper portion and a vertical wall portion of a building comprising a sheet of deformable material, formed so as to provide in its cross-sectional profile between first and second linearly extending spaced apart edge portions a plurality of continuous surfaces including both flat and curved surfaces connected through bends at adjoining boundaries of the surfaces, at least one of said linearly extending edge portions being formed to contact and be horizontally retained on a mating support structure proximate fixedly attached to said vertical wall covered by said product when mounted to assist said product when elevated to be self supporting while retained on said mating support structure, said product including a molded block member secured proximate said vertical wall fitted within and substantially filling the interior of said product and having an outer surface molded to substantially mate said profile surfaces.

51. (New) An architectural trim product according to claim 50 which comprises the cross head piece over a door or window, the fascia between the roofline, the transitional freeze,
